PROFESSIONAL EXPERIENCE

Team Leader – MIS Operations

Quess Corp | Jaipur, Rajasthan

Aug 2024 – Present

- Lead end-to-end MIS operations including preparation of Agent Voice/Non-Voice Productivity Reports, Client Attrition Reports, and Retention & Influencing Reports with visual dashboards.
- Leverage AI tools (ChatGPT, Microsoft Copilot, Claude, Gemini) to generate actionable business insights from raw operational data, reducing manual analysis time by ~40%.
- Develop interactive web dashboards using HTML, CSS, JavaScript, and Python with AI-assisted coding in VS Code and Antigravity IDE, enabling real-time process visibility for management.
- Built and deployed Google AppSheet applications for field data collection and process automation, syncing data to Google Sheets on cloud in real time.
- Design and maintain visual dashboards on Power BI and Google Data Studio tailored to diverse management requirements for data-driven decision-making.
- Handle ad-hoc report requests with fast turnaround, ensuring all non-standard data requirements are addressed within agreed timelines.

- Collaborate cross-functionally across departments to gather accurate information and deliver timely reporting insights to senior stakeholders.
- Create and manage Web Forms and Google Forms for capturing structured data from customers and employees to improve operational workflows.

MIS Executive & MIS Analyst

Apr 2023 – Jul 2024

Medicure Pharma | Jaipur, Rajasthan

- Performed periodic data analysis and generated daily, weekly, monthly, and quarterly MIS reports to support management decision-making.
- Developed Google AppSheet apps for process automation, collecting and storing operational data on cloud-based Google Sheets.
- Created Web Forms and Google Forms to capture critical data from customers and employees, streamlining information flow across departments.
- Prepared pivot tables, charts, and trend reports to assist the management team with business performance evaluation.
- Maintained and updated MIS documentation to ensure ease of system maintenance and operational efficiency.
- Monitored industry trends and best practices to continually improve reporting standards and analytical approaches.

MIS Executive & E-Commerce Analyst

Mar 2022 – Apr 2023

Poddar Footwear Private Limited | Jaipur, Rajasthan

- Maintained and enhanced existing MIS systems; generated customised reports across daily, weekly, monthly, and quarterly cycles.
- Developed reports to track key performance metrics including customer acquisition, revenue, and customer retention.
- Analyzed customer behavior and recommended data-backed strategies to optimize conversion rates and revenue growth.
- Identified customer trends and segmentation patterns to inform product development and marketing strategies.
- Created and managed a Flowchart Management System (FMS) to monitor and document operational workflows.
- Built productivity dashboards and shared reports on MIS portals, ensuring data accuracy and accessibility for management.

Back Office & Data Entry Specialist

May 2020 – Jan 2022

Bansal Elastomers Private Limited | Jaipur, Rajasthan

- Processed, verified, and recorded data into information systems; audited and entered tax contracts into database systems.
- Extracted data from source documents and maintained organized records in Microsoft Excel and Google Sheets.
- Created Google Forms for multi-department data collection, improving data standardization and accessibility.
- Ensured data integrity by testing systems for accuracy and maintaining strict adherence to data entry procedures.

KEY ACHIEVEMENTS & VALUE DELIVERED

- Reduced manual reporting effort by ~40% at Quess Corp by integrating AI tools (ChatGPT, Copilot, Claude) into the daily MIS workflow for automated insight generation.
- Built interactive HTML/CSS/JS/Python dashboards using AI-assisted development in VS Code, improving data visualization accessibility across operations teams.
- Developed 3+ Google AppSheet applications at Medicure Pharma and Quess Corp, replacing manual paper-based data collection with automated cloud-synced systems.
- Designed a Flowchart Management System (FMS) at Poddar Footwear to standardize and document over 10 key operational processes.
- Consistently delivered ad-hoc MIS reports within tight SLAs for senior management across 4 organizations spanning manufacturing, pharma, e-commerce, and BPO sectors.
